Does Your School Need School Library Software?

Have You Found Other Products Complicated And Expensive?

We Have The Solution

School Library Software doesn't have to break the bank.

Peninsula QuickTrack Pro For Schools is a complete School Library system at an affordable price.

Simple To Use

Although simple to use, it is also powerful and professional, QuickTrack for schools automates your library quickly and easily.

Built In Cataloguing

The built in cataloguing uses the internet to look up the book details and automatically enter them into QuickTrack.

Our online catalogue database is always up to date and is free of charge to use, it is automatically updated when new books are published.

Automatic Data Entry

Simply scan the barcode on the book and the details will be entered automatically. Our software even retrieves an image of the book cover.

This function can also obtain catalogue information for most CD's, DVD's and some Videos.

Low Running Costs

You can use the existing barcodes on the books you have, saving you both time and money with no labels to print out. Multiple copies can also be coped with easily.

Easy For Students To Use

This is a great activity for your school's students to help get them involved with the library and feel part of its operation.
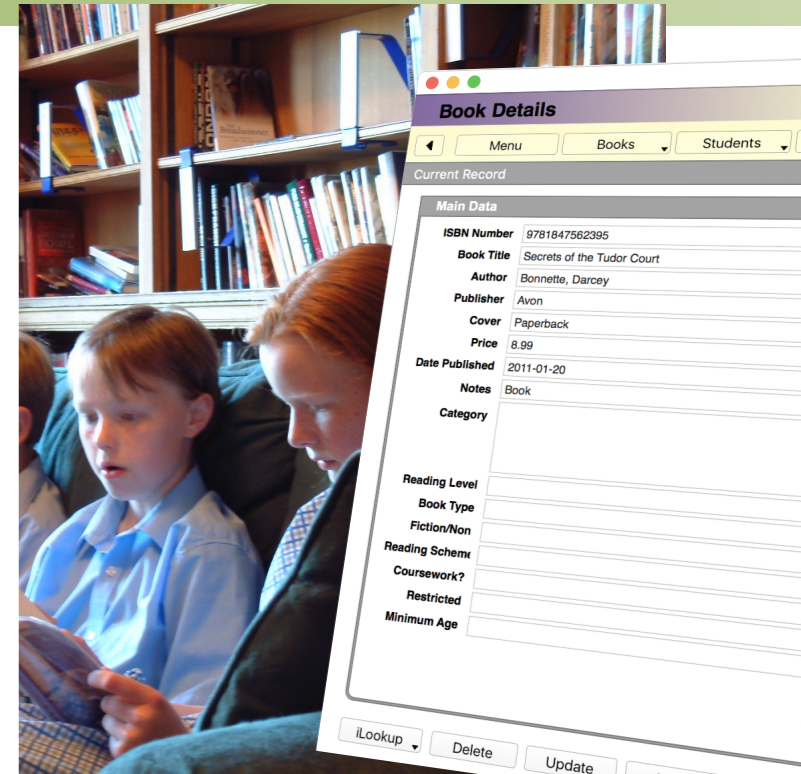

You can also import existing book databases from other sources such as csv and excel, for quick and easy setup.

Complete Book Tracking History

Once entered the book's record contains tracking information for where the book has been over time. You can access this to find out which books are more and less popular, which could be of immense use when deciding which books to buy for the future.

Easily Personalisable

Personalise QuickTrack Pro from the default personality, change field names, logos, popup lists, in the easy to use personality editor.

· **30 years experience**

PLATFORMS

Microsoft Windows Vista and Above

Apple Macintosh OSX 10.8 and Above
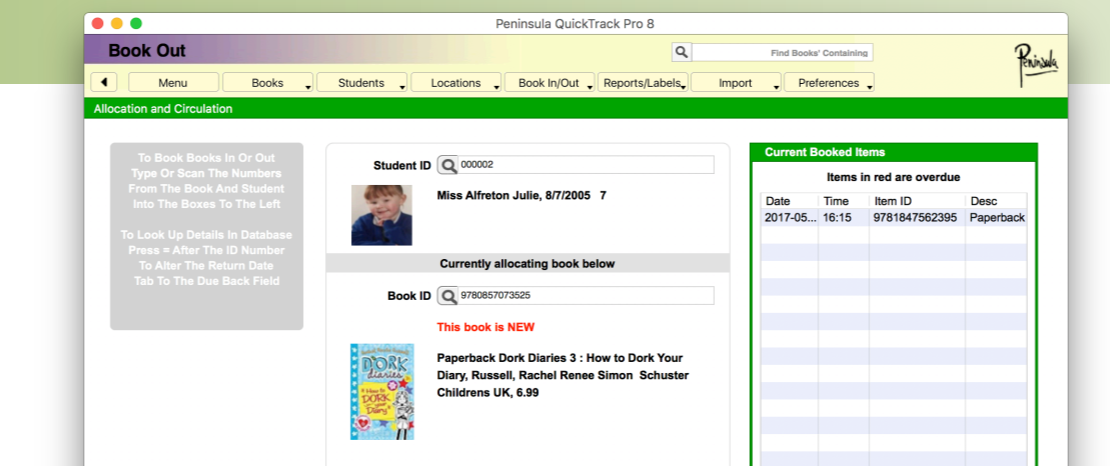

Simple Circulation Management

Checking books in and out couldn't be easier. Even the youngest of students can do this easily.

Simply choose 'Book In' or 'Book Out' from the 'Book In/Out' menu and choose a student. You can do this either on screen or using a barcoded ID card which the software can print for you.

See The Borrowers Current Books

Your students details will instantly appear and to the right it will show what books they already have.

Then scan the books barcode to bring its' details up, and click the 'Book Out' button to book it out. It is that easy.

Complete With Barcode Scanner

In addition to this software you will also receive via the post a barcode reader to use with the system. The Phoenix requires no additional software to function and just pretends it is another keyboard.

This reader is designed specifically to be used to scan book barcodes quickly and efficiently. This scanner has proved to read even the most unscannable barcodes every time.

Fully Guaranteed Barcode Reader

The reader is guaranteed for the length of the license and a free of charge replacement can be obtained should the reader cease to function
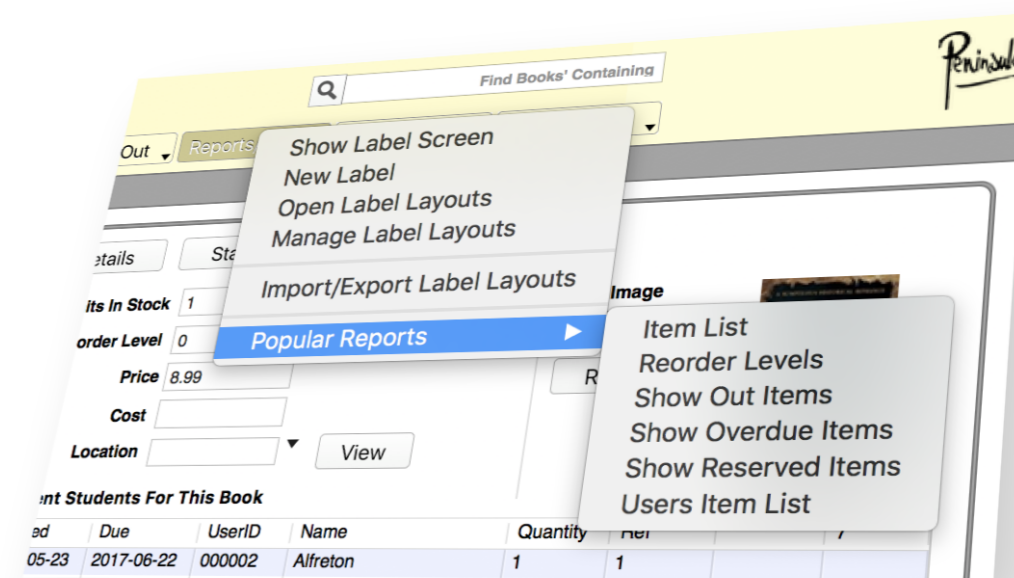

Simply return it to us, for a replacement by return. Normally this is very unlikely to happen.

It couldn't be easier to get started with your school library.

QuickTrack For Schools gets you started quickly.

Complete Comprehensive Student Database

Adding students is easy, you can either import them from a csv file or enter individual students by hand.

Each student's record shows their borrowing history and all the details required for book tracking.

Instantly Show Who Has What

Checking who has what is easy, just enter either the books name or the students name or id into the find box at the top of the screen and hit return.

A list will be shown of either the books with that name or the students with that name.

Click one item to show that books borrower. Saving you time chasing where books have disappeared to.

Easy To Use Reports

Once you have been using the software for a while it might be that you need information on who has what, what's overdue or other information.

QuickTrack for Schools has built in reporting and labelling features as standard which allow you to easily collect or print out information that you require.

Fully Customisable

All reports are fully customisable and can be added to easily. A full report and label editor is included in Quicktrack.

Popular reports can be stored in their own folder for easy access, enabling you to quickly get the information you need.

Report data can also be saved to csv files for use elsewhere or shown as a list on screen.
